

# MWS systems: consumer prices

Prices per piece | As of: 2021-02-18

All prices are net amounts in euros (€) and are plus all statutory taxes and duties (e.g. customs duties) and expenses that are not included in the installation fee and must be clarified individually with the customer (e.g. necessary construction work that goes beyond the final assembly of the hardware components). The maintenance flat rate and the user fees are adjusted according to the respective requirements: Index adjustment, price increases/decreases from suppliers (server costs, other cost increases/decreases).

Consumers are locations for MWS systems. For bulk orders with a quantity of 3 or more systems we give quantity discount, which is to be agreed individually. We offer separate franchising offers for B2B customers who want to make money with distribution of systems.

A MWS system consists of hardware components and software for operation. The system hardware includes a terminal (\*) with a touchscreen for function control of the system, a camera box (\*\*) with camera and laser technology for recording the ball path lines and displaying the ball positions, a remote control for controlling the system and placing the balls, as well as a webcam (\*), flat screen (\*)(\*\*\*) and headset for multimedia conference circuit and communication between two remote locations. An upright maintenance fee is mandatory for the operation of a MWS system. | (\*) Installation on a wall next to the billiard table | (\*\*) Installation on the ceiling above the billiard table | (\*\*\*) Not included in delivery, is provided by the customer

Hardware that is manufactured by MWS has a warranty for 5 years from commissioning. The manufacturer's respective warranty applies to hardware that is manufactured by another manufacturer (third party product). MWS attaches great importance to the compatibility of the system with subsequent system generations. MWS guarantees for 5 years from commissioning the basic functionality of the system - remote billiards - and therefore, if necessary, exchanges the necessary hardware components within this period free of charge. Upgrades exceeding this limit as well as replacement and repair of hardware outside the warranty must be paid by the customer.

		PURCHASE	LEASING	RENT
<b>One-time costs</b>	€ 7,500 full payment system hardware	✓		
	€ 2,000 first payment system hardware		✓
